This year marks our 22nd on property bull sale. The bulls on offer are a reflection of our commitment to the industry and a draft of bulls that are renowned for outstanding doing ability, weight for age, high fertility with superior carcass genetics.

Manchee Agriculture has had a long commitment to the improvement of the Shorthorn Breed and the beef cattle industry as a whole. This years bulls represent the breeding philosophy of fertile cattle with weight for age and superior carcass traits. The bulls are stacked with trait leading sires that are suited to all aspects of the industry and are backed by outstanding steer trial results from national carcass competitions.

We have catalogued some of the Shorthorn breeds highest indexing bulls suited to all Australian beef markets. This years catalogue of bulls is one of our most even lines offered, with more than 90% of bulls ranking in the top 25% of the breed for either domestic, export or northern maternal indexes.

2016 sees the first offering of Durham Tropical bulls for sale by auction. The sale draft offers outstanding versatility, adaptability, meat quality, MSA compliance, in a fertile tropically adapted package. Durham Tropical steers continue to perform exceptionally consistently in steer trials winning the ANZ National Champion Carcass at Beef Australia in 2015. Durham Tropical bulls have been used as far north as Cloncurry, Qld, west to Alice Springs in the NT and east to Guyra on the NSW New England tablelands.

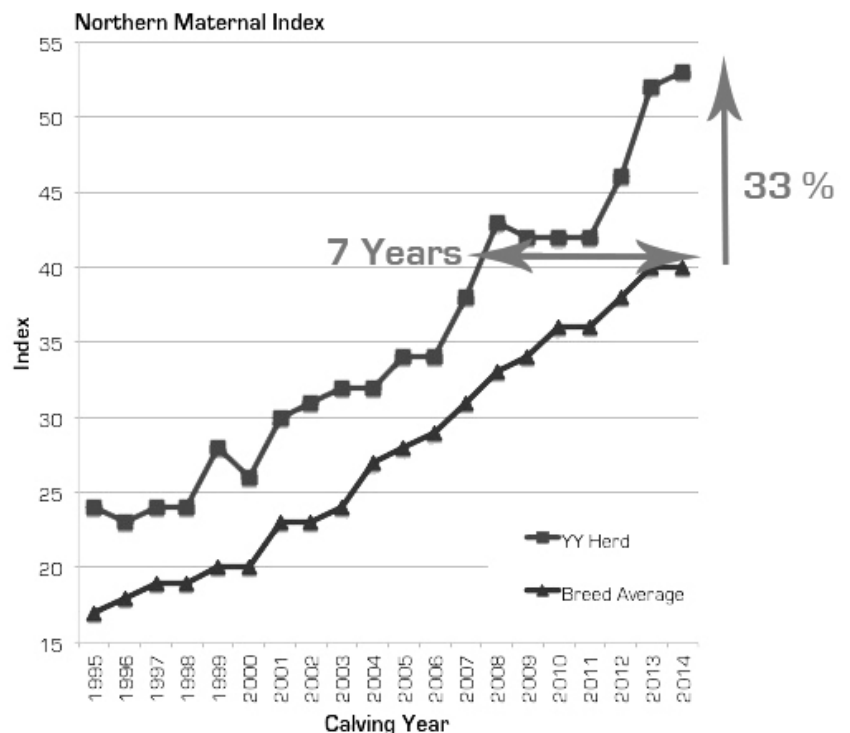

Please don't hesitate to contact us for further information. We look forward to seeing you at our 22nd annual sale.

John & Liz Manchee

TAKE A 7 YEAR GENETIC LEAP

The Northern Maternal Index of the Yamburgan Herd is 7 years ahead and 33% above the breed average.

Manchee Agriculture have always strived to breed cattle that are industry relevant, at all points in the production system. Our belief that we are 'beef' producers makes us aware of the whole supply chain, not just live cattle. Balancing the ability to have functional, fertile females, producing calves that weigh and hit chiller specifications with consumer satisfaction, is the ultimate goal. We are conscious of the need to produce a protein source to feed the worlds growing population but are compelled to produce a product that will provide the consumer with repeatable quality eating experiences. Within our breeding program we are identifying the curve bending sires that are producing high EMA and IMF progeny, two traits that are generally negatively correlated. The Shorthorn breed has the ability to increase red meat yield and produce a product second to none. Recent feedback has highlighted these traits in Yamburgan genetics.

"We're identifying 'curve bending' sires... producing progeny with large EMA's, high fat and IMF."

2016 RNA 100 day Paddock to Plate Class

100 days on feed	
Mort & Co Feedlot	
Sold July 2016	
14 steers	
Average Age	20 months, milk tooth
Average Live Weight	712 kg
Average Daily Weight Gain	2.78 kg/day
DWG Placing	7th (from 59 pens)

2016 RNA 70 day Paddock to Plate Class

70 days on feed	
Mort & Co Feedlot	
Sold July 2016	
14 steers	
Average Age	16 months, milk tooth
Average Live Weight	599 kg
Average Daily Weight Gain	3.08 kg/day
DWG Placing	4th (from 40 pens)

2016 RAS Beef Challenge - Domestic Class

70 days on feed	
Wilga Feedlot & Processed at ACC	
Sold July 2016	
9 Steers & 15 Heifers	
Average Age	16 months, milk tooth
Average Carcase Weight	252 kg
Average MSA Index	62.21
Average EMA	75 sq/cm
Average Fat (P8/Rib)	9/7 mm
Average MSA Marble	341
Average Return (per head)	\$1,509.44

"55 Carcase & Feedlot Awards in 5 years"

Performance recording is of vital importance in the Manchee Agriculture operation. MA believes in the utilisation of large contemporary groups to allow animals, that meet our tough selection criteria, to be identified and offered at our sale. **This years two year old bulls were assessed for scanning in a contemporary group of 104 bulls and the yearling bulls were in a group of 33.**

Our ability to focus on the combination of practical breeding principles including fertility, calving ease, weight for age and carcase quality sets MA apart when it comes to our strength in all selection indexes.

CE % Direct = Direct Calving Ease - influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 & 300 days of age. Values are adjusted to 200 days and for age of dam.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam.

Mature Cow Weight EBV (kg) based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

Milk EBV (kg) estimates an animal's milking ability. For sires, it indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

Carcase Weight EBV (kg) is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcase data, adjusted to a standard 300 kg carcase. This EBV estimates genetic differences in eye muscle area at the

12/13th rib site of a 300 kg dressed carcase.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcase.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield in a standard 300 kg carcase.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices (\$'s) are reported as EBVs, in units of relative earning capacity for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values.

Domestic Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting pasture grown and finished steers for the domestic trade (eg. supermarket).

Export Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting steers for the Japanese B3 market. Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days.

Northern Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in northern Australia (eg Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10 mm P8 fat depth).

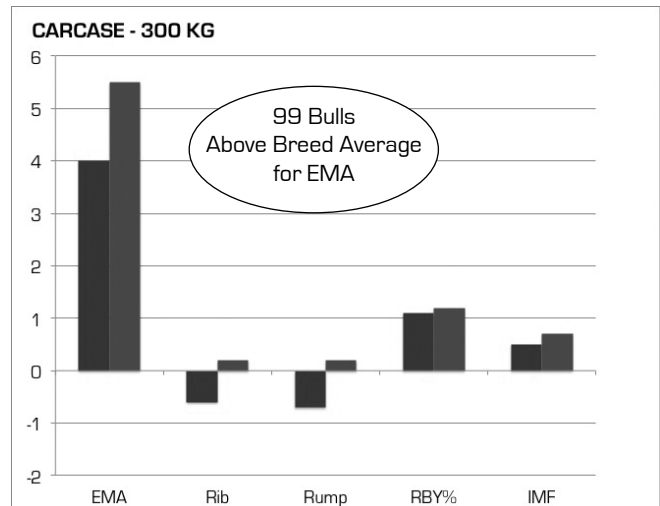

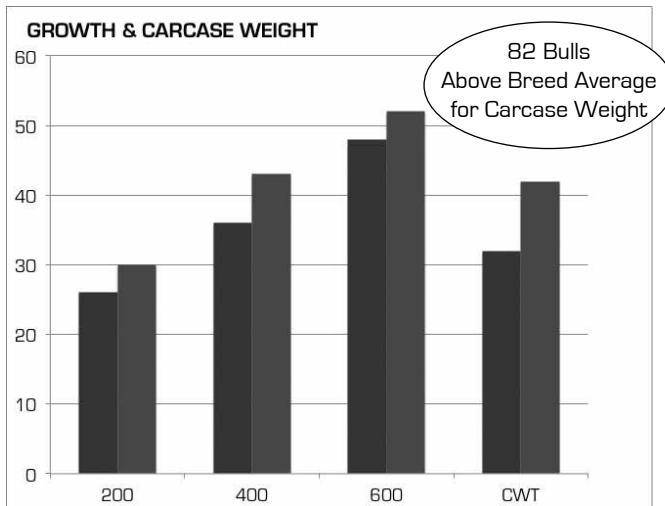

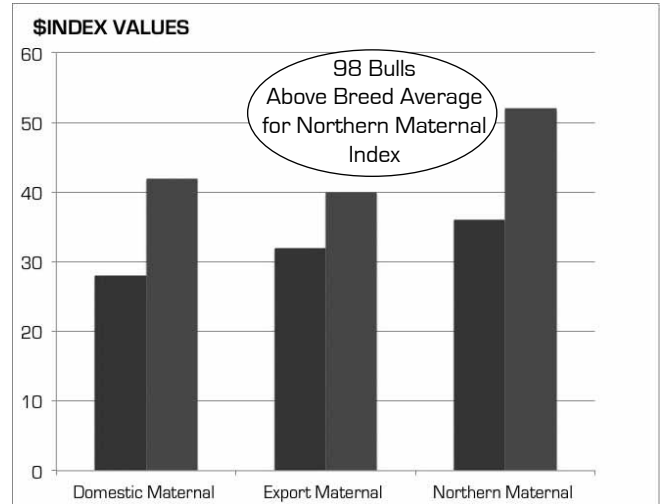

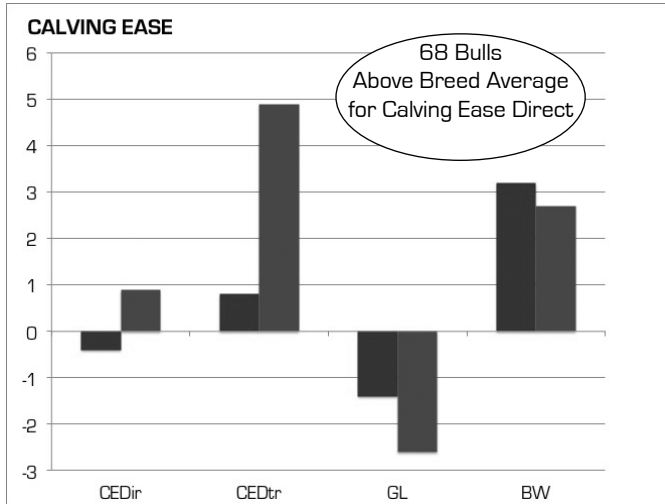

Accuracy (%) - An accuracy value is presented as a percentage with every EBV. Accuracy of 90% & above are a high accuracy estimate of the animal's true breeding value and it is unlikely that EBVs will change considerably with additional data. Accuracy of 75 - 90% are of medium-high accuracy and will usually have been calculated based on the animal's own performance and the performance for a small number of progeny. Accuracy of 50 - 74% are of medium accuracy and will usually have been calculated based on the animal's own performance and some pedigree information. Accuracy of less than 50% are preliminary and could change substantially as more direct performance information becomes available.

Traits Observed: BWT, 600WT, SS, FAT, EMA, IMF.

A young sire with enormous potential, Lot 3 has been one of the standouts in his contemporary group since weaning. Emperor E103 is producing outstanding females that are breeding on, and BP Countess D14 we regard as one of our best breeding females. It is rare to find this combination of high IMF, EMA and fats.
Top 1% - rib & rump fat, IMF, export maternal & northern maternal indexes. **Top 5%** - 600 day weight, EMA, domestic maternal index. **Top 15%** - gestation length, 400 day weight. **Top 20%** - 200 day weight.

YAMBURGAN GRISSOM (P) (AI)

20 February 2011

Grissom is a sire that has bred very true to type, his daughters are neat uddered with the volume of their sire. He produces cattle with length, shape, carcass and soundness. Grissom sired steers in the Beef Australia National Carcass Competition class 5 (260-340kg carcass) winning pen. He is a trait leader for all three growth traits and retail beef yield. He is in the Top 1% for Northern Maternal Index, top 5% for Export Maternal Index and top 10% for Domestic Maternal Index.

He is represented by 13 sons.

117 Progeny Analysed, 112 Birth Weight Progeny, 58 Scan Progeny, 1 daughter.

YAMBURGAN EMPEROR E103 (P)

15 July 2009

E103 is extremely balanced and structurally sound with a lot of fill through the hindquarter. He was a very easy doing bull, which is evident in his fat figures. The more data we are collecting on Emperor, the more he continues to impress. He is a trait leader for gestation length, scrotal size, EMA and IMF and is in the top 1% for both rib & rump fat. Top 5% of the breed for the Northern Maternal Index, top 10% for Domestic Maternal Index and top 15% for Export Maternal Index. Homozygous Poll.

He is represented by 14 sons.

237 Progeny Analysed, 230 Birth Weight Progeny, 144 Scan Progeny, 19 daughters.

YAMBURGAN OSSIE E65 (P)

3 July 2009

Ossie E65 is a moderate framed, slick coated sire with an excellent hind quarter and top line. He has excellent structure and temperament. Y Jill 132nd has bred extremely well over a long period, her first calf sold to Evan Flint, South Bundara stud for \$10,000 (and is the sire of South Bundara Dividend) and she has three daughters retained. Ossie E65 is a trait leader for 400 & 600 day weight, carcass weight, EMA and IMF. Top 15% for Export Maternal Index and top 20% for Domestic & Northern Maternal Indexes.

He is represented by 14 sons.

178 Progeny Analysed, 173 Birth Weight Progeny, 95 Scan Progeny, 8 daughters.

YAMBURGAN SPARTA F149 (P)

2 August 2010

Sparta carries exceptional carcass characteristics though the hindquarter and top line. He has a great mix of genetics combining Aladdin and Theodore giving excellent carcass shape and softness in one package. Some of the standout lots in this years catalogue are sired by Sparta F149. We admire the width, spring of rib and muscling ability of the Sparta F149 progeny but also the females he is producing. These genetics are blending well with our current sires. He is a trait leader for gestation length and EMA. Top 20% for Domestic Maternal Index. Homozygous Poll. He is represented by 7 sons.

205 Progeny Analysed, 205 Birth Weight Progeny, 76 Scan Progeny, 8 daughters.

YAMBURGAN TOBERMOREY (P) (AI)

21 July 2010

This is the second drop of sons to be offered by Tobermorey. He is structurally sound, smooth fronted and strong topped with a slick coat. We are extremely happy with both the males and females Tobermorey is breeding. His daughters have excellent calving ease with beautiful udders and teats. He is a trait leader for 400 & 600 day weight, scrotal size, carcass weight, EMA and retail beef yield. Top 1% for Northern Maternal Index, top 5% for Export Maternal Index and top 10% for Domestic Maternal Index. He is represented by 17.

YAMBURGAN ZEUS H140 (P)

22 APRIL 2012

Zeus H140 is an outstanding sire offering low birth, a proven carcass sire and a feminine female producer. The further we go down the track with Zeus the more impressed we are with his progeny. He is a trait leader for gestation length, birth weight, scrotal size and IMF. He is a genuine calving ease sire. He is in the top 1% for the Domestic Maternal Index, top 5% for the Export and Northern Maternal Indexes.

He is represented by 14 sons.

YAMBURGAN EMPEROR G679 (P)

3 OCTOBER 2011

A sire that is breeding exceptionally well. He was sold to the Brownlie family in 2013 for \$14,000. His dam is an outstanding female, one of the top breeders within the herd. Emperor G679 breeds very complete, stylish, efficient cattle with excellent cover. He is a trait leader for scrotal size (one of the highest of the breed). He is in the top 5% for the Northern Maternal and Domestic Maternal indexes and top 15% for the Export Maternal Index. He is represented by 2 sons.

26 Progeny Analysed, 22 Birth Weight Progeny, 13 Scan Progeny.

YAMBURGAN HECTOR G418 (P) (SFA)

9 AUGUST 2011

Hector G418 is a maternal brother to Y Tobermorey F90. He has bred a beautiful line of replacement heifers that are currently calving with excellent results and very neat udders. He breeds a lot of carcass shape and expressive muscle that are moderate framed, sound structured cattle that fit all market specifications. He is represented by 7 sons.

48 Progeny Analysed, 48 Birth Weight Progeny, 22 Scan Progeny.

MOOMBI OOKTALI G34 (P)

5 AUGUST 2010

Ooktali G34 was the Grand Champion bull at both the 2013 Sydney Royal Show and Dubbo National Show & Sale. He was purchased in partnership with Bungulla Stud for \$30,000. He is breeding exceptionally wide thurled cattle with good weight for age and structural correctness. Two of the leading bulls in this years catalogue are sired by Ooktali. He is a trait leader for 200, 400 & 600 day weight, EMA and retail beef yield. He is in the top 1% for Northern Maternal Index, top 10% for Export Maternal index and top 15% for Domestic Maternal Index. He is represented by 3 sons.

112 Progeny Analysed, 110 Birth Weight Progeny, 48 Scan Progeny.

WILGAROON SIR LANCELOT (P) (AI) (ET)

2 AUGUST 2009

Sir Lancelot is the best Landlord son we have bred. He is a very structurally correct bull with excellent muscling and is a soft easy doing bull. He is a purebred Santa bull displaying all the characteristics we are looking for in our Durham Tropical cattle. Represented by 3 bulls.

WILGAROON DUNKIRK (P) (AI) (ET)

25 FEBRUARY 2008

Dunkirk is an extremely thick bull with an outstanding temperament. He is out of the outstanding cow in Sapphire, the dam of Murrumbo Beaumon (P) a sire that has been very influential in the breed. Sapphire is the dam of 15 calves, 14 classified. He is a purebred Santa bull displaying all the characteristics we are looking for in our Durham Tropical cattle. Represented by 2 bulls.

MANCHEE JESTER D281 (P)

3 JULY 2009

Jester D281 is our current leading sire in the Durham Tropical program. His genetics combine well the Warenda Mexico Durham Topical bloodlines. His sire, Wilgaroon Jester (P), was Grand Champion Santa Gertrudis Bull at the 2004 EKKA. Wilgaroon Jester adds massive yield and muscle. D281 is a moderately framed bull with an enormous hindquarter and wide top line. Homozygous poll. Represented by 5 bulls.

WILGAROON MEXICO H96 (P)

10 MARCH 2012

Mexico H96 breeds a lot of weight for age and depth through the hindquarter. A very smooth coated, structurally correct, quiet bull that has been used heavily in our Durham Tropical program. The Mexico bloodlines are synonymous with adding softness and carcass to their progeny. Warenda Mexico is pictured right. Represented by 6 bulls.

WILGAROON JESTER F358 (P)

9 AUGUST 2010

Jester F358 was kept because he was in the top 1% for GeneStar feed efficiency and GeneStar marbling. He had a naturally quiet temperament and a thick carcass pattern with the softness we are looking for. He was joined to heifers in his first season with these bulls the resulting progeny. Unfortunately we lost F358, this will be his only drop of calves. Represented by 4 bulls.

Selling half possession share and 100% marketing rights (see page 52 for more details). Monkira K303 is a super sire in the making, the first calf to be offered out of our super donor dam, BP Harmony F55. K303 is a very long bodied bull with a lot of weight for age and a very similar outlook to Y Zeus H140, his maternal brother. A great opportunity to purchase a young sire who we believe will have an enormous impact in the Shorthorn breed. **Top 1%** - scrotal size, domestic maternal, export maternal & northern maternal indexes. **Top 5%** carcass weight, EMA. **Top 10%** - calving ease direct, 200 & 600 day weights, milk. **Top 15%** - 400 day weight, retail beef yield. **Top 20%** calving ease daughters.

Lot 31 is a very high performing white bull, scanned very well in his contemporary group. A smooth coated, deep hindquartered bull that is very hard to fault and only 35kg born. Y Cloudy G615 is breeding very well, she has just weaned another top calf for next year. A stylish, efficient cow who I would like a herd of. **Top 1%** export maternal & northern maternal indexes. **Top 5%** - carcase weight, domestic maternal index. **Top 10%** - calving ease direct, calving ease daughters, 600 day weight, scrotal size, EMA. **Top 15%** - 400 day weight. **Top 20%** - milk. **Top 25%** - 200 day weight, retail beef yield.

Traits Observed: CE,BWT,200WT,400WT,600WT,SS,FAT,EMA,IMF

K442 is an exciting young sire who we believe will have an enormous impact within the breed. It's rare to find a bull with a 37kg actual birth weight, excellent calving ease combined with an EMA in the top 5%. K442 displays an enormous hindquarter, like his sire, but has a maternal pedigree as strong as any female in the breed. From a contemporary group of 104 bulls, K442 was in the top three for EMA and top 14 for IMF. **Top 1%** - carcass weight, domestic maternal, export maternal & northern maternal indexes. **Top 5%** 400 & 600 day weights, EMA. **Top 10%** - 200 day weight. **Top 15%** - rib fat. **Top 20%** rump fat. **Top 25%** calving ease direct, scrotal size, retail beef yield.

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

1300 15 31 35 07 3041 5053
www.elitelivestockauctions.com.au

- 1  Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
- 2  Click on the "Sign Up" page / link
- 3  Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
- 4  Agree to the Elite livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5  Click "Register"
- 6  You will then be notified by email that an account has been created
- 7  Once an account has been created you are all "Set to Bid"
- 8  Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
- 9  Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
- 10  The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
- 11  On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
- 12  At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

DURHAM TROPICAL BULLS

The Durham Tropical program was developed in conjunction with a Central Australian cattleman to breed bulls that have high meat quality, fertility and heat tolerance. To do this we incorporated our two highest DNA tested Santa Gertrudis sire lines for marbling and tenderness. The selected sire lines were backed by females of exceptional breeding quality, with 100% fertility. The Durham Tropical cattle continue to perform both in feedlot and carcass competitions as well as in our breeding program with stringent fertility and adaptability requirements. Durham Tropical steers have performed well in all steer trials competed in. In 2014 and 2013, Durham Tropical steers won the RAS 70 day domestic competition and in 2013 they won Champion EU pen of steers in the Primex Beef competition.

DIRECTIONS TO MANCHEE AGRICULTURE

YOU CAN ALSO FIND US ON **GOOGLE MAPS** BY SEARCHING FOR MANCHEE AGRICULTURE.

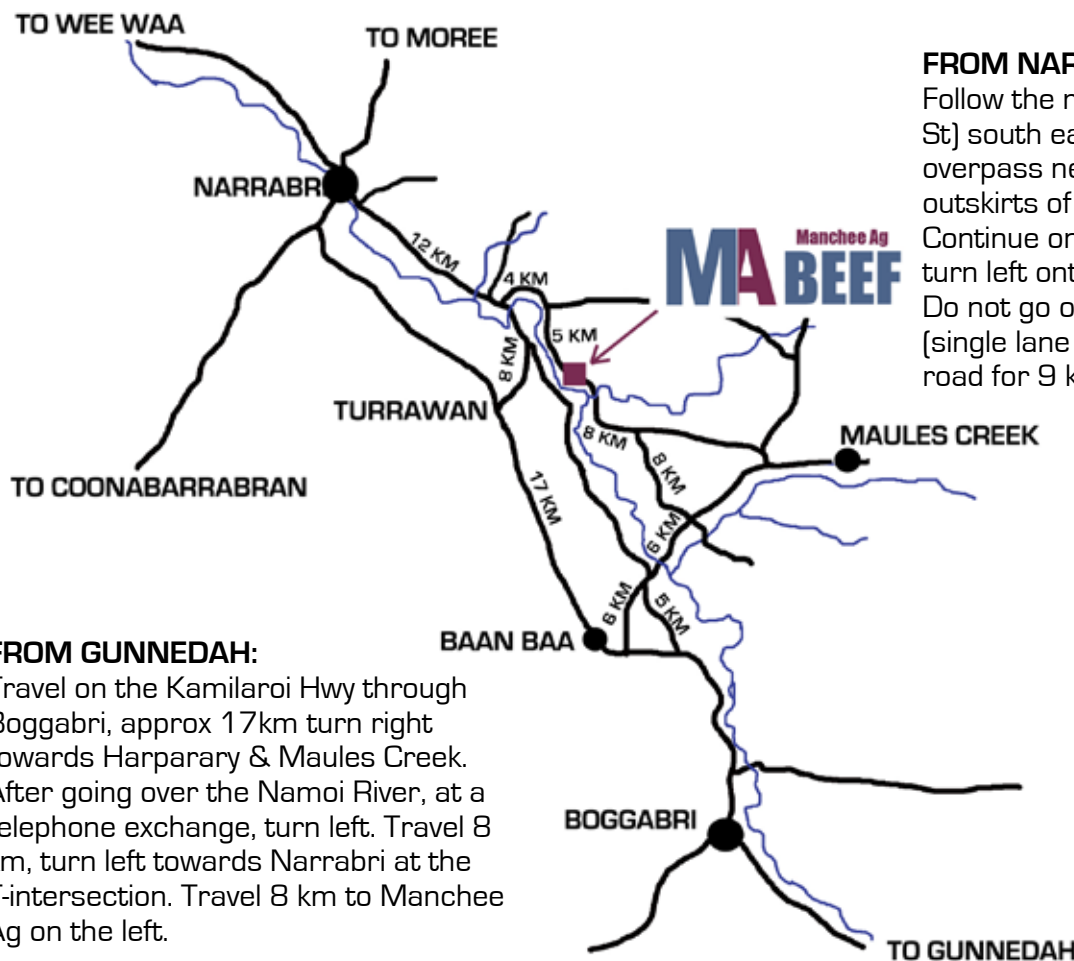

Look for blue & white MANCHEE AG road signs.

FROM NARRABRI:

Follow the main street (Maitland St) south east, under the railway overpass near the RSL club on the outskirts of town. Continue on this road for 12 km, turn left onto the Maules Creek Rd. Do not go over the Namoi River (single lane bridge). Travel on this road for 9 km.

FROM GUNNEDAH:

Travel on the Kamilaroi Hwy through Boggabri, approx 17km turn right towards Harparary & Maules Creek. After going over the Namoi River, at a telephone exchange, turn left. Travel 8 km, turn left towards Narrabri at the T-intersection. Travel 8 km to Manchee Ag on the left.

ACCOMMODATION CAN BE DIFFICULT TO GET IN NARRABRI - PLEASE BOOK EARLY.
 MOTEL DETAILS ARE AVAILABLE ON THE SALE INFORMATION PAGE.

Lots showing the YY logo are selected as potential sires or donors for Manchee Agriculture to use in the future. Manchee Agriculture retains the right to collect up to 300 straws, for in herd use at no cost to the purchaser. Manchee Agriculture will collect semen at an agreed time with the purchaser.

LOT 12 - INFORMATION

The purchaser of lot 12, YY K303, will receive 50% physical possession and 100% marketing rights of the bull, with the purchaser to have full use for the first joining season. Manchee Ag's joining times will be mutually agreeable to both purchaser and seller. Please contact us for more details on joining periods, transport and health requirements.

SUPPLEMENTARY SHEET

All bulls will have up to date weights, EMA, fat depth, scrotal size measurements and have been semen tested. A supplementary sheet with this information will be available from the 21st August, 2015. Group Breedplan figures are printed in the catalogue. Any bull with a shaded Breedplan figure indicates he is in the Top 25% of the breed for that trait.

INSPECTION

We encourage prospective buyers to inspect cattle prior to sale. This gives us an opportunity to assist you in your selection of the best genetics for your requirements. Inspection on sale day will be from 9am.

ACCOMMODATION

Accommodation can be hard to get in Narrabri, we recommend you book early.
