This year marks our 23rd on property bull sale. The bulls on offer are a reflection of our commitment to the industry and a draft of bulls that are renowned for outstanding doing ability, weight for age, high fertility with superior carcase genetics.

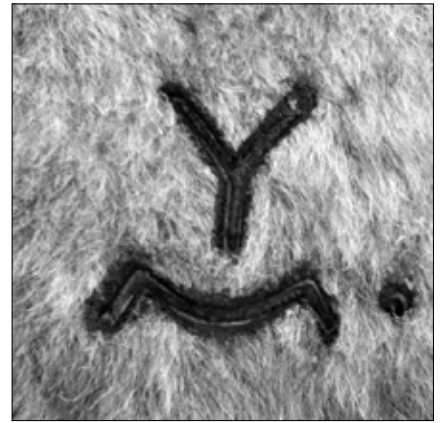

Manchee Agriculture has had a long commitment to the improvement of the Shorthorn Breed and the beef cattle industry as a whole. This years bulls represent the breeding philosophy of fertile cattle with weight for age and superior carcase traits. The bulls are stacked with trait leading sires that are suited to all aspects of the industry and are backed by outstanding steer trial results from national carcase competitions.

We have catalogued some of the Shorthorn breeds highest indexing bulls suited to all Australian beef markets. This years catalogue of bulls is one of our most even lines offered, with more than 90% of bulls ranking in the top 25% of the breed for either domestic, export or northern maternal indexes.

2017 sees our second offering of Durham Tropical bulls for sale by auction. The sale draft offers outstanding versatility, adaptability, meat quality, MSA compliance, in a fertile tropically adapted package. Durham Tropical steers continue to perform exceptionally consistently in steer trials winning the ANZ National Champion Carcase at Beef Australia in 2015. Durham Tropical bulls have been used as far north as Cloncurry, Qld, west to Alice Springs in the NT and east to Guyra on the NSW New England tablelands.

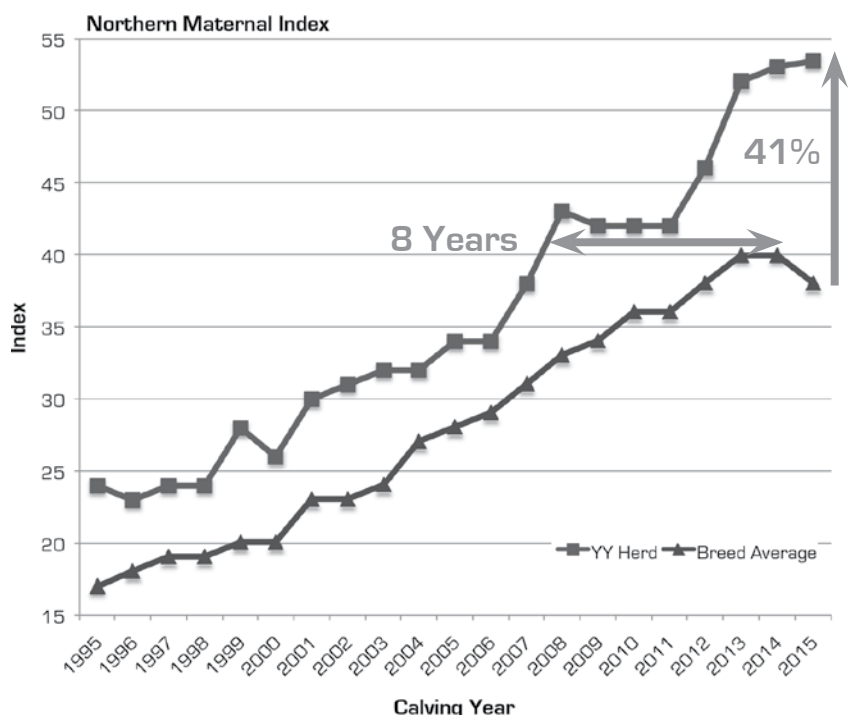

Please don't hesitate to contact us for further information. We look forward to seeing you at our 23rd annual sale.

John & Liz Manchee

TAKE A 8 YEAR GENETIC LEAP

The Northern Maternal Index of the Yamburgan Herd is 8 years ahead and 41% above the breed average.

Manchee Agriculture have always strived to breed cattle that are industry relevant, at all points in the production system. Our belief that we are 'beef' producers makes us aware of the whole supply chain, not just live cattle. Balancing the ability to have functional, fertile females, producing calves that weigh and hit chiller specifications with consumer satisfaction, is the ultimate goal. We are conscious of the need to produce a protein source to feed the worlds growing population but are compelled to produce a product that will provide the consumer with repeatable quality eating experiences. Within our breeding program we are identifying the curve bending sires that are producing high EMA and IMF progeny, two traits that are generally negatively correlated. The Shorthorn breed has the ability to increase red meat yield and produce a product second to none. Recent feedback has highlighted these traits in Yamburgan genetics.

*"We're identifying 'curve bending' sires...
producing progeny with
large EMA's, high fat and IMF."*

Performance recording is of vital importance in the Manhee Agriculture operation. MA believes in the utilisation of large contemporary groups to allow animals, that meet our tough selection criteria, to be identified and offered at our sale. **This years two year old bulls were assessed for scanning in a contemporary group of 104 bulls, the yearling bulls were in a group of 40 bulls and the Durham Tropical bulls were in a group of 30 bulls.**

Our ability to focus on the combination of practical breeding principles including fertility, calving ease, weight for age and carcass quality sets MA apart when it comes to our strength in all selection indexes.

CE % Direct = Direct Calving Ease - influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 & 300 days of age. Values are adjusted to 200 days and for age of dam.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam.

Mature Cow Weight EBV (kg) based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

Milk EBV (kg) estimates an animal's milking ability. For sires, it indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at

the 12/13th rib site of a 300 kg dressed carcass.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield in a standard 300 kg carcass.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices (\$'s) are reported as EBVs, in units of relative earning capacity for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values.

Domestic Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting pasture grown and finished steers for the domestic trade (eg. supermarket).

Export Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting steers for the Japanese B3 market. Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days.

Northern Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in northern Australia (eg Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10 mm P8 fat depth).

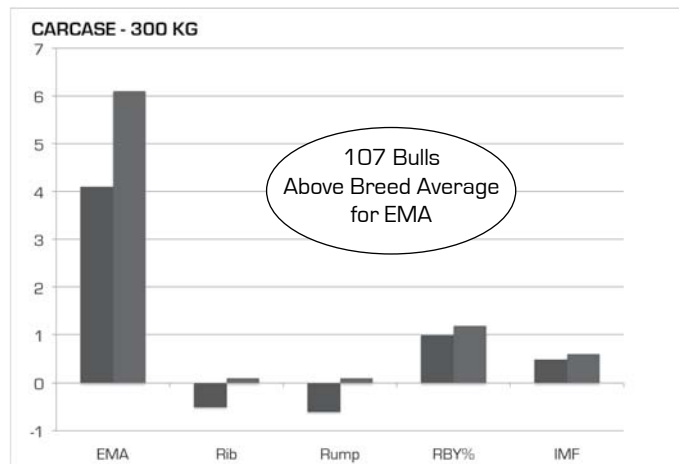

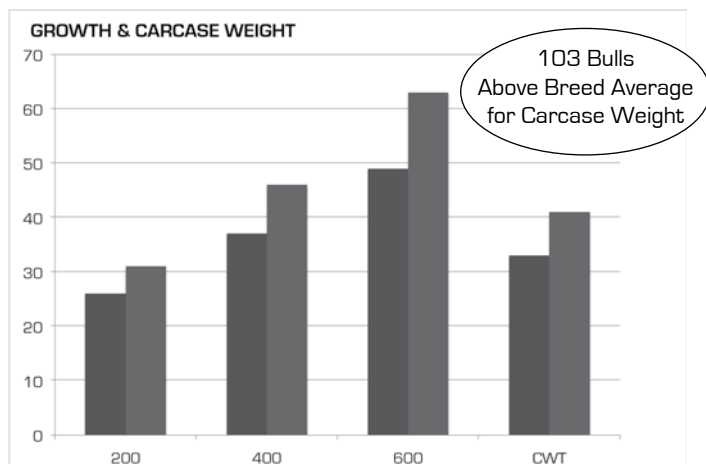

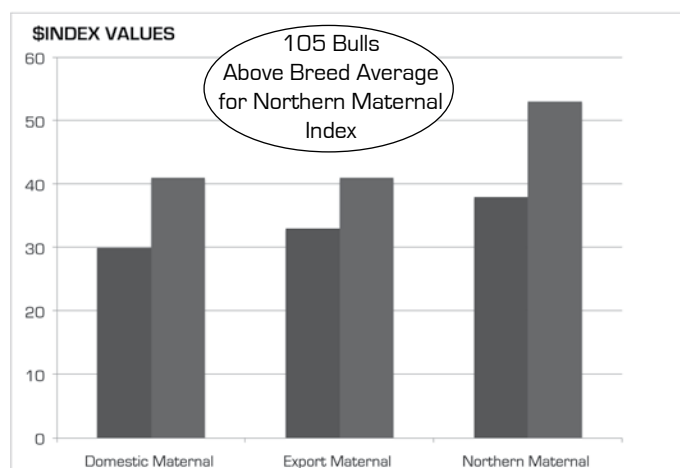

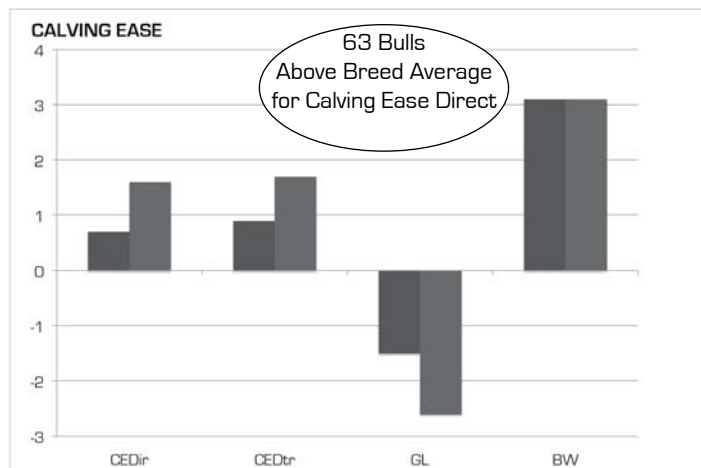

Accuracy (%) - An accuracy value is presented as a percentage with every EBV. Accuracy of 90% & above are a high accuracy estimate of the animal's true breeding value and it is unlikely that EBVs will change considerably with additional data. Accuracy of 75 - 90% are of medium-high accuracy and will usually have been calculated based on the animal's own performance and the performance for a small number of progeny. Accuracy of 50 - 74% are of medium accuracy and will usually have been calculated based on the animal's own performance and some pedigree information. Accuracy of less than 50% are preliminary and could change substantially as more direct performance information becomes available.

Trade Observed: BWT, 600WT, SS, FAT, EMA, IMF.

A young sire with enormous potential. Lot 3 has been one of the standouts in his contemporary group since weaning. Emperor E103 is producing outstanding females that are breeding on, and BP Countess D14 we regard as one of our best breeding females. It is rare to find this combination of high IMF, EMA and fat.

Top 1% - rib & rump fat, IMF, export maternal & northern maternal indexes. Top 5% - 600 day weight, EMA, domestic maternal index. Top 15% - gestation length, 400 day weight. Top 20% - 200 day weight.

**YAMBURGAN GRISSOM (P) (AI)**

20 February 2011

Grissom is a sire that has bred very true to type, his daughters are neat uddered with the volume of their sire. He produces cattle with length, shape, carcass and soundness. Grissom sired steers in the Beef Australia National Carcass Competition class 5 (260-340kg carcass) winning pen. He is a trait leader for all three growth traits and retail beef yield. He is in the Top 5% for Northern Maternal Index, Export Maternal Index and Domestic Maternal Index. He is represented by 7 sons.

136 Progeny Analysed, 81 Scan Progeny, 8 daughters.

**ELOORA DESIGNER J06 (P) (ET) (AI)**

16 March 2013

Judged as the Dubbo National Show and Sale Champion Bull in 2014, Designer has bred a line of very carcass orientated bulls that scanned very highly for EMA and IMF within their contemporary groups. Designer is a genuine carcass improver but will also add a slick coat, structural soundness and marbling to his progeny. J06 is a trait leader for 200, 400, 600 day weight, scrotal and EMA. He is represented by 11 sons.

49 Progeny Analysed, 26 Scan Progeny.

**YAMBURGAN OSSIE E65 (P)**

3 July 2009

Ossie E65 is a moderate framed, slick coated sire with an excellent hind quarter and top line. He has excellent structure and temperament. Y Jill 132nd has bred extremely well over a long period, her first calf sold to Evan Flint, South Bundara stud for \$10,000 (and is the sire of South Bundara Dividend) and she has three daughters retained. Ossie E65 is a trait leader for 400 & 600 day weight, carcass weight, EMA and Scrotal. Top 5% for Domestic Maternal Index and top 10% for Export & Northern Maternal Indexes. He is represented by 7 sons.

204 Progeny Analysed, 140 Scan Progeny, 23 daughters.

YAMBURGAN SPARTA F149 (P)

2 August 2010

Sparta carries exceptional carcase characteristics though the hindquarter and top line. He has a great mix of genetics combining Aladdin and Theodore giving excellent carcase shape and softness in one package. Some of the standout lots in this years catalogue are sired by Sparta F149. We admire the width, spring of rib and muscling ability of the Sparta F149 progeny but also the females he is producing. These genetics are blending well with our current sires. He is a trait leader for gestation length and EMA. Top 5% for Domestic Maternal Index, top 10% for Northern Maternal Index, top 25% Export Maternal Index. Homozygous Poll. He is represented by 15 sons.

229 Progeny Analysed, 129 Scan Progeny, 15 daughters.

YAMBURGAN TOBERMOREY (P) (AI)

21 July 2010

This is the second drop of sons to be offered by Tobermorey. He is structurally sound, smooth fronted and strong topped with a slick coat. We are extremely happy with both the males and females Tobermorey is breeding. His daughters have excellent calving ease with beautiful udders and teats. He is a trait leader for 200, 400 & 600 day weight, scrotal size, carcase weight, EMA and retail beef yield. Top 1% for Northern Maternal Index, top 5% for Export Maternal Index and top 10% for Domestic Maternal Index. He is represented by 26.

306 Progeny Analysed, 199 Scan Progeny, 28 daughters.

YAMBURGAN ZEUS H140 (P)

22 April 2012

Zeus H140 is an outstanding sire offering low birth, a proven carcase sire and a feminine female producer. The further we go down the track with Zeus the more impressed we are with his progeny. He is a trait leader for gestation length, birth weight, scrotal size and IMF. He is a genuine calving ease sire. He is in the top 1% for the Domestic Maternal Index, Export and Northern Maternal Indexes. He is represented by 18 sons.

224 Progeny Analysed, 123 Scan Progeny, 4 daughters.

**YAMBURGAN EMPEROR G679 (P)**

3 October 2011

A sire that is breeding exceptionally well. He was sold to the Brownlie family in 2013 for \$14,000. His dam is an outstanding female, one of the top breeders within the herd. Emperor G679 breeds very complete, stylish, efficient cattle with excellent cover. He is a trait leader for scrotal size, 600 day weight and EMA. He is in the top 5% for the Northern Maternal and Domestic Maternal indexes and top 20% for the Export Maternal Index. He is represented by 6 sons.

35 Progeny Analysed, 29 Scan Progeny.

**YAMBURGAN GENERAL H188 (P) (AI)**

9 June 2012

Y General H188 sold in our 2014 sale to Peter Caskey, SA, for \$27,000. General has developed into a magnificent sire, a very soft, easy doing sire with explosive growth to 400 days. General is a moderate framed bull with a lot of width through the hindquarter. We believe General will have a big impact through our herd because of his combination of softness and muscle pattern but in an efficient package. He is a trait leader for 200, 400, 600 day weight. Top 1% Northern Maternal index, top 5% Domestic Maternal index, top 10% Export Maternal Index. He is represented by 2 sons.

10 Progeny Analysed, 8 Scan Progeny.

**MOOMBI OOKTALI G34 (P)**

5 August 2010

Ooktali G34 was the Grand Champion bull at both the 2013 Sydney Royal Show and Dubbo National Show & Sale. He was purchased in partnership with Bungulla Stud for \$30,000. He is breeding exceptionally wide thurled cattle with good weight for age and structural correctness. Two of the leading bulls in this years catalogue are sired by Ooktali. He is a trait leader for 200, 400 & 600 day weight, EMA and retail beef yield. He is in the top 10% for Northern Maternal Index, top 15% for Domestic Maternal index and top 25% for Export Maternal Index. He is represented by 5 sons.

144 Progeny Analysed, 84 Scan Progeny, 1 daughter.

WILGARROON SIR LANCELOT (P) (AI) (ET)

2 August 2009

Sir Lancelot is the best Landlord son we have bred. He is a very structurally correct bull with excellent muscling and is a soft easy doing bull. He is a purebred Santa bull displaying all the characteristics we are looking for in our Durham Tropical cattle. Represented by 1 son.

**WILGARROON DUNKIRK (P) (AI) (ET)**

25 February 2008

Dunkirk is an extremely thick bull with an outstanding temperament. He is out of the outstanding cow in Sapphire, the dam of Murrumbo Beaumon (P) a sire that has been very influential in the breed. Sapphire is the dam of 15 calves, 14 classified. He is a purebred Santa bull displaying all the characteristics we are looking for in our Durham Tropical cattle. Represented by 3 sons.

**MANCHEE JESTER J128 (P)**

18 March 2013

Jester J128 displays a lot of his grand sires traits, he breeds tremendous carcass shape and width into his progeny. J128 is only a young sire who is breeding both exceptional males and females, a low birthweight bull that has been used with heifers. J128 has grown into a magnificent sire, big, muscular and very sound structured. Pictured is his sire Manchee Jester D281. Represented by 3 sons.

**MANCHEE MEXICO F34 (P)**

17 February 2010

Mexico F34 is an extremely soft easy doing bull, as all the Mexico cattle tend to be. Mexico F34 breeds a lot of depth of hindquarter and spring of rib into his progeny, which is evident with the extra weight for age they carry. A very quiet bull who has bred a very consistent line of cattle. Pictured is his sire Warena Mexico. Represented by 1 son.

**WILGARROON TEMPLER E199 (H)**

27 October 2011

Templer E199's track record is well known, he is the sire of the 2015 Beef Australia Champion Carcass. Templer E199 breeds a lot of depth of hindquarter, weight and length of body into his progeny. The great influence of E199 is with the females he breeds, they are beautiful uddered, well framed females that will produce many great bulls into the future. Represented by 2 sons.

L483 is one of the standout lots in this year's catalogue. A bull with a very similar pedigree to last year's sale topping Y Sparta K442 who sold to the Bungulla Stud for \$38,000. Lot 44 is a very soft, easy doing bull with fat figures in the top 1% of the breed, but also a beautiful carcass pattern and carcass shape.

Top 1% - rib & rump fat. **Top 5%** - EMA. **Top 10%** - domestic maternal & northern maternal indexes. **Top 15%** - 400 day weight. **Top 20%** - carcass weight. **Top 25%** - 200 & 600 day weights, IMF, export maternal index.

The youngest of the spring bulls to be offered this year and one of the standout lots of the catalogue. Lot 74 is in the top 1% of the breed for all indexes, it's very rare to see a bull so good across every trait, a young bull with enormous potential. This particular Cloudy female line is the same as the great breeding sire Y Mittiebah 3rd, a female line that has bred very true to type for many years.

Top 1% - domestic, export & northern maternal indexes. **Top 5%** - calving ease direct, calving ease daughters, days to calving. **Top 10%** - gestation length, birth weight, milk, scrotal size, carcass weight. **Top 15%** - rump fat, IMF. **Top 25%** - 400 day weight, rib fat.

Traits Observed: BWT, 200WT, 600WT, SS, FAT, EMA, IMF

The first of a great run of yearling bulls. A young sire we thought long and hard about keeping. We have already retained three sons out of Y Connie D133, these being Y Tobermorey, Y Kookaburra J214 and Y Hector G418. Lot 84 is an ET calf from a very small contemporary group, his birth weight is high because of his excellent weight for age, this will change with more data.

Top 1% - 200, 400 & 600 day weight, scrotal size & carcase weight. **Top 5%** - EMA, retail beef yield. **Top 10%** - days to calving.

Top 20% - gestation length, milk.

Traits Observed: BWT, 200WT, 400WT, SS, FAT, EMA, IMF

2 semen lots to be offered on a per straw basis with the purchaser of Lot 109A having the first offer to purchase Lot 109B for the same price. No other semen will be sold in M14 this year.

Yamburgan Monkira M14 is an outstanding sire prospect, a bull of this potential only comes along every 10 years. A young sire with herd changing potential, slick coated moderate framed with one of the best top lines of a young bull I've not seen since Zeus H140 was this age. M14 is out of a contemporary group of 40 excellent yearling bulls, his numbers speak for themselves.

Top 1% - carcase weight, EMA, export maternal index. **Top 5%** - domestic maternal & northern maternal indexes. **Top 10%** - calving ease direct, 400 & 600 day weights, retail beef yield. **Top 15%** - 200 day weight. **Top 20%** - milk. **Top 25%** - calving ease daughters.

The Durham Tropical program was developed in conjunction with a Central Australian cattleman to breed bulls that have high meat quality, fertility and heat tolerance. To do this we incorporated our two highest DNA tested Santa Gertrudis sire lines for marbling and tenderness. The selected sire lines were backed by females of exceptional breeding quality, with 100% fertility. The Durham Tropical cattle continue to perform both in feedlot and carcass competitions as well as in our breeding program with stringent fertility and adaptability requirements. Durham Tropical steers have performed well in all steer trials competed in. In 2014 and 2013, Durham Tropical steers won the RAS 70 day domestic competition and in 2013 they won Champion EU pen of steers in the Primex Beef competition.

LOT 110 | MANCHEE DUNKIRK L197 (P) COM

DOB: 12/07/2015 (25 Months)

DIRECTIONS TO MANCHEE AGRICULTURE

YOU CAN ALSO FIND US ON **GOOGLE MAPS** BY SEARCHING FOR MANCHEE AGRICULTURE.

Look for blue & white MANCHEE AG road signs.

FROM NARRABRI:

Follow the main street (Maitland St) south east, under the railway overpass near the RSL club on the outskirts of town.

Continue on this road for 12 km, turn left onto the Maules Creek Rd. Do not go over the Namoi River [single lane bridge]. Travel on this road for 9 km.

FROM GUNNEDAH:

Travel on the Kamilaroi Hwy through Boggabri, approx 17km turn right towards Harparary & Maules Creek. After going over the Namoi River, at a telephone exchange, turn left. Travel 8 km, turn left towards Narrabri at the T-intersection. Travel 8 km to Manchee Ag on the left.

ACCOMMODATION CAN BE DIFFICULT TO GET IN NARRABRI - PLEASE BOOK EARLY.
MOTEL DETAILS ARE AVAILABLE ON THE SALE INFORMATION PAGE.

Independant sale day advice from Alastair Rayner

Specialising in:

- > bull selection
- > EBV explanation & application
- > technical advice

For more information visit raynerag.com.au

Rayner4g

Lots showing the YY logo are selected as potential sires or donors for Manchee Agriculture to use in the future. Manchee Agriculture retains the right to collect up to 300 straws, for in herd use at no cost to the purchaser. Manchee Agriculture will collect semen at an agreed time with the purchaser.

SUPPLEMENTARY SHEET

All bulls will have up to date weights, EMA, fat depth, scrotal size measurements and have been semen tested. A supplementary sheet with this information will be available from the 21st August, 2017. Group Breedplan figures are printed in the catalogue. Any bull with a shaded Breedplan figure indicates he is in the Top 25% of the breed for that trait.

INSPECTION

We encourage prospective buyers to inspect cattle prior to sale. This gives us an opportunity to assist you in your selection of the best genetics for your requirements. Inspection on sale day will be from 9am.

ACCOMMODATION

Accommodation can be hard to get in Narrabri, we recommend you book early.

Nandewar Motor Inn - (02) 6792 1155 or 1800 027 941.

Southern Cross Motor Inn - (02) 6792 3838.

Club Motor Inn - (02) 6792 3191

Mid Town Inn - (02) 6792 2233

Adelong Motel - (02) 6792 1488

TRANSPORT

Bulls sold in to Queensland, South Australia, Victoria, Tasmania and Northern Territory are eligible for a transport rebate from Manchee Agriculture to the NSW border only.

HEALTH

All bulls have been vaccinated with VibrioVac, 7 in 1 and Pestiguard and drenched with Dectomax on 6th July 2017. Booster shots are due in June each year. Semen testing will be carried out by Geoff Steinbeck, Excel Genetics, Dungowan. (02) 6769 4251. The bulls are guaranteed fertile on the day of the sale.

BREEDING GUARANTEE

All bulls are guaranteed to be breeders with the exception of:

- (a) In the event of injury or disease that occurs to the animal after the sale;
- (b) Gross negligence or wilful misconduct on the part of the purchaser.

BUYERS INSTRUCTION

1. No verbal instructions will be accepted.
2. Please use the instruction slip provided by the settling agents and hand it to the booking clerk before leaving.
3. Instructions for dispatch for consignments comprising of more than one owner must be signed by each buyer, no instructions will be considered complete until all have been signed.
4. All bulls will be sold GST exclusive.

BUYER REGISTRATION

We request that all prospective buyers register and receive a buyer number before the sale.

OUTSIDE AGENT REBATE

An outside agent rebate of 3% will be offered to agents who attend the sale and introduce their clients in writing to Hamilton Mortimer Agency, 02 6792 3163, at least 24 hours prior to the sale. Agents introducing their clients in writing at least 24 hours prior to the sale and not attending the sale will be paid a 1% rebate. The rebate WILL NOT be paid outside these conditions.

AIRCRAFT

There is an airstrip at Narrabri. Vendor's agents will be happy to arrange transport to the sale. Please make contact well before the sale date.

DISCLAIMER

The vendors, selling agents, its members, related corporations and employees, will act with due care to provide correct information but will not be responsible for any errors or omissions in this catalogue. All persons who attend the sale do so entirely at their own risk and the vendor, Manchee Agriculture, JT & EN Manchee, LJC & RT Manchee and the selling agents do not assume or accept any responsibility or liability, of whatever nature, legal or otherwise, for any accident, injury or damage which may occur.
