The last 12 months have been a trying one for all on the land. The weather has proven difficult and seems determined to remain that way. The dry has continued its domination of most of the eastern seaboard as has Manchee Ag genetics in steer trials, with wins in the RAS Beef Challenge 100 day Competition and the ANZ Beef Australia Carcase Competition. Pens were entered in the ANZ Beef Australia Carcase Competition to defend our 2015 Champion Carcase Title. There were 1077 steers entered in the competition from every state of Australia. MA steers placed in every class entered. In the 2017 RAS Beef Challenge we were awarded 1st, 2nd & 3rd for profitability, with all the MA cattle being 230% above the trial average. Combine this with this year's pregnancy test result of 92% across the herd, which indicates profitability and sustainability every year. Even in years like this one, where it is more of a challenge to balance both ends of the spectrum.

We have continued our focus on the end product, our genetics and how premiums can be delivered to our clients. Manchee Agriculture strongly believes data accuracy and performance are the keys to moving our genetics forward. Therefore, the entire 2016/17 drop of bulls, heifers and steers have been scanned and carcase data submitted to Breedplan. This enables you to have access the breed's highest indexing genetics, with more the 90% of this years catalogue ranking in the top 25% of the breed for either Domestic, Export or Northern Indexes.

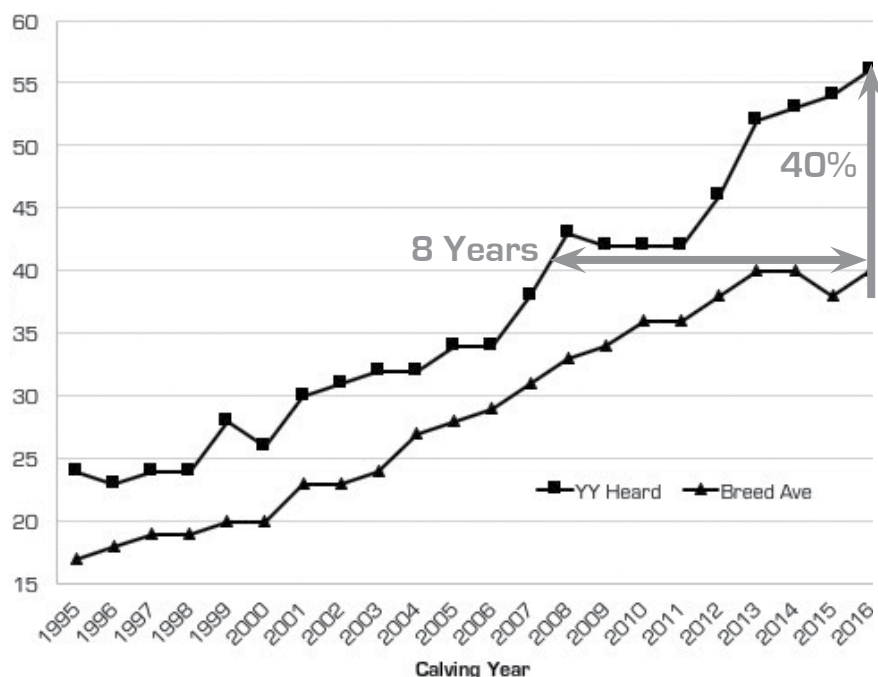

The Shorthorn Thousand Guineas branded beef program has been successful within the food sector. JBS are now always looking for cattle for this branded product. Please consider supplying into this premium market.

Please don't hesitate to contact us for further information. We look forward to seeing you at our 24th annual sale.

John & Liz Manchee

TAKE A 8 YEAR GENETIC LEAP

The Northern Maternal Index of the Yamburgan Herd is 8 years ahead and 40% above the breed average.

2017 was again a very successful year for our benchmarking carcase trials; these independent feedlot trials are so valuable to our breeding program and genetic selection process. All entries are fed in the same location on the same diet and for the same amount of time.

The RAS Beef Challenge competition cattle are fed at the Wilga Feedlot, Bellata in northern NSW. Thanks must go to the MacCue family and all the RAS Councillors for running such an industry relevant competition.

Manchee Agriculture won:
 Champion Pen 100 day
 Champion Individual
 Res Champion Individual
 1st, 2nd & 3rd Pens for Profitability
 1st & 3rd Pens for Feedlot Performance
 2nd Pen Carcase grid

"70 Carcase & Feedlot Awards in 7 years"

Performance recording is of vital importance in the Manchee Agriculture operation. MA believes in the utilisation of large contemporary groups to allow animals, that meet our tough selection criteria, to be identified and offered at our sale. **This years two year old bulls were assessed for scanning in a contemporary group of 104 bulls, the yearling bulls were in a group of 40 bulls and the Durham Tropical bulls were in a group of 45 bulls.**

Our ability to focus on the combination of practical breeding principles including fertility, calving ease, weight for age and carcass quality sets MA apart when it comes to our strength in all selection indexes.

CE % Direct = Direct Calving Ease - influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 & 300 days of age. Values are adjusted to 200 days and for age of dam.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam.

Mature Cow Weight EBV (kg) based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

Milk EBV (kg) estimates an animal's milking ability. For sires, it indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at

the 12/13th rib site of a 300 kg dressed carcass.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield in a standard 300 kg carcass.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices (\$'s) are reported as EBVs, in units of relative earning capacity for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values.

Domestic Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting pasture grown and finished steers for the domestic trade (eg. supermarket).

Export Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting steers for the Japanese B3 market. Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days.

Northern Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in northern Australia (eg Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10 mm P8 fat depth).

Accuracy (%) - An accuracy value is presented as a percentage with every EBV. Accuracy of 90% & above are a high accuracy estimate of the animal's true breeding value and it is unlikely that EBVs will change considerably with additional data.

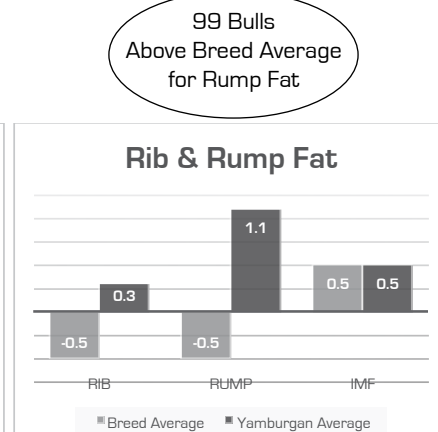

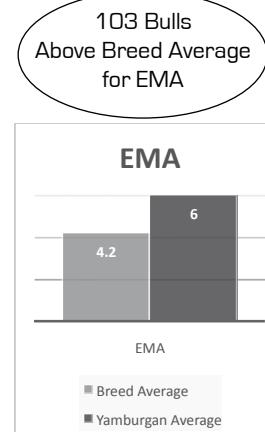

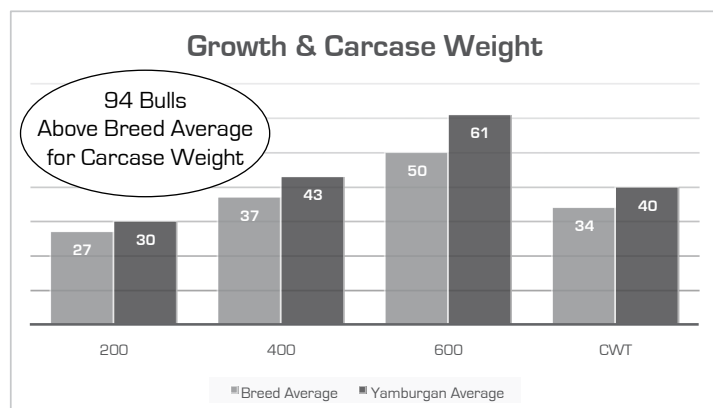

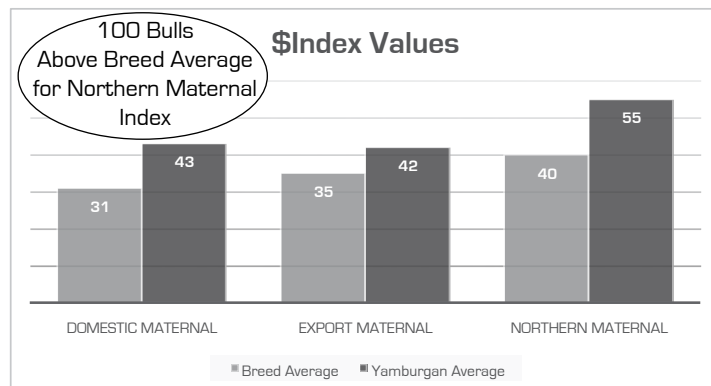

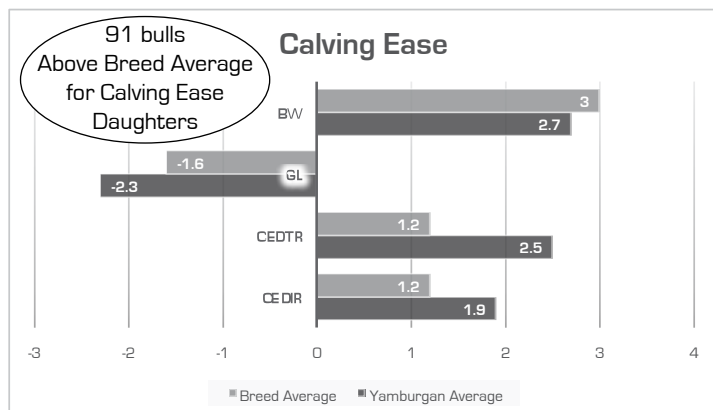

Accuracy of 75 - 90% are of medium-high accuracy and will usually have been calculated based on the animal's own performance and the performance for a small number of progeny. Accuracy of 50 - 74% are of medium accuracy and will usually have been calculated based on the animal's own performance and some pedigree information. Accuracy of less than 50% are preliminary and could change substantially as more direct performance information becomes available.

A young sire with enormous potential. Lot 3 has been one of the standouts in his contemporary group since wearing Emperor E103 is producing outstanding females that are breeding on, and BP Countess D14 we regard as one of our best breeding females. It is rare to find this combination of high IMF, EMA and fat.

Top 1% - rib & rump fat, IMF, export maternal & northern maternal indexes. Top 5% - 600 day weight, EMA, domestic maternal index. Top 15% - gestation length, 400 day weight. Top 20% - 200 day weight.

**YAMBURGAN GRISSOM G31 (P) (AI)**

20 February 2011

Grissom is a sire that has bred very true to type, his daughters are neat uddered with the volume of their sire. He produces cattle with length, shape, carcase and soundness. Grissom sired steers in the 2015 Beef Australia National Carcase Competition class 5 (260-340kg carcase) winning pen. He is a trait leader for all three growth traits and retail beef yield. He is a trait leader for 200, 400, 600 day weights and carcase weight. He is represented by 10 sons.

193 Progeny Analysed, 100 Scan Progeny, 12 daughters.

**YAMBURGAN ZEUS H140 (P)**

22 April 2012

Zeus H140 is an outstanding sire offering low birth, a proven carcase sire and a feminine female producer. The further we go down the track with Zeus the more impressed we are with his progeny. He is a trait leader for gestation length, birth weight and scrotal size. He is a genuine calving ease sire. He is in the top 1% for the Domestic Maternal Index and Export Maternal Indexes and a trait leader for GL, BW and SS.

He is represented by 23 sons.

387 Progeny Analysed, 183 Scan Progeny, 22 daughters.

**YAMBURGAN OSSIE E65 (P)**

3 July 2009

Ossie E65 is a moderate framed, slick coated sire with an excellent hind quarter and top line. He has excellent structure and temperament. Y Jill 132nd has bred extremely well over a long period, her first calf sold to Evan Flint, South Bundara stud for \$10,000 (and is the sire of South Bundara Dividend) and she has three daughters retained. Ossie E65 is a trait leader for 400 & 600 day weight, carcase weight, EMA and Scrotal. Top 1% for EMA. Top 5% for Domestic Maternal Index Northern Maternal Index, days to calving and gestation length. Top 10% for Export Maternal Index and milk. He is represented by 3 sons.

YAMBURGAN KOOKABURRA J214 (P) (AI)

10 August 2013

A slick coated, well muscled sire with tremendous fill through the twist and lower leg. Kookaburra J214 has curve bending figures with a +1.8 birth weight EBV and +62 600 day weight EBV. We have been very impressed with the first drop of calves by J214, they are very true to type and consistent. His dam, Y Connie D133, is also the dam of Y Tobermorey F90 and Y Hector G418, a very high performance female who always breeds. Trait leader for EMA. Top 1% for all indexes. **Homozygous Poll.** He is represented by 9 sons.

41 Progeny Analysed, 16 Scan Progeny.

THE GROVE SHERLOCK JO110 (P)

6 September 2013

The Grover Sherlock JO110 was purchased for \$46,000 in 2015 from The Grove sale. A very slick coated, high yielding sire who's progeny performed well in the Beef Australia National Carcase Competition this year. His feedlot steers have impressed with high EMA and marbling results. Sherlock's legacy will be his females. He has bred a beautiful line of replacement heifers. The Grove Sherlock JO110 is a trait leader for 200, 400 and 600 day weights, EMA and RBV. He is represented by 6 sons.

70 Progeny Analysed, 29 Scan Progeny.

YAMBURGAN SPARTAN K442 (P)

19 September 2014

Y Spartan K442 was used as a yearling bull before being sold in our 2016 sale for \$38,000 to Pete & Lou Capel, Bungulla Stud, Manilla. He is a very muscular, deep hind quartered bull who has bred an excellent line of calves. We have retained a son this year, Y Spartan N27. K442's dam is a beautiful Thunder daughter who we rate very highly, she is one of the highest indexing females in the breed and the dam of retained sires' Monsoon J37 and Zeus M499. K442 has the top value in the breed for EMI and NMI. Top 1% for carcase weight, EMA and DMI. He is a trait leader for 200, 400 and 600 day weights. He is represented by 4 sons.

14 Progeny Analysed, 8 Scan Progeny.

**YAMBURGAN ZEUS K62 (P)**

20 March 2014

Y Zeus K62 was one of the first Y Zeus H140 sons to be offered and was purchased by David White, Glen Innes for \$26,000 in 2015. A beautifully balanced, sound structured bull who was a standout in his contemporary group. He has bred an outstanding line of calves, very true to type. Y Zeus K62 offers tremendous length of body and strength of spine, combined with low birth weight and high rib and rump fats. K62's dam is a very impressive Y Emperor E103 daughter who is from the famed Margaret female line. K62 is in the top 1% for gestation length, birth weight, days to calving, rib and rump fat, DMI and a trait leader for gestation length, birth weight and scrotal size. He is represented by 5 sons. Homozygous Polled.

22 Progeny Analysed, 8 Scan Progeny.

**THE GROVE F915 (P)**

3 November 2010

The Grove F915 was loaned to us by Peter Caskey in 2015 after seeing the performance of the calves at Little Amp, SA. He is a moderate framed, deep hind quartered bull, who breeds very true to type. F915 is a very low birth weight, high rib and rump fat sire. F915 is a trait leader for birth weight and is in the top 1% for rib and rump fat. He is represented by 8 sons.

29 Progeny Analysed, 17 Scan Progeny.

**YAMBURGAN GENERAL H188 (P) (AI)**

29 June 2012

Y General H188 sold in our 2014 sale to Peter Caskey, SA, for \$27,000. General has developed into a magnificent sire, a very soft, easy doing sire with explosive growth to 400 days. General is a moderate framed bull with a lot of width through the hindquarter. We believe General will have a big impact through our herd because of his combination of softness and muscle pattern but in an efficient package. He is a trait leader for 200, 400, 600 day weight and scrotal size. Top 5% 600 day weight, milk, days to calving and NMI. He is represented by 13 sons

49 Progeny Analysed, 23 Scan Progeny.

MANCHEE LANCELOT J307 (P)

7 September 2013

Lancelot J307 was an outstanding individual from a very early age, a sire with an enormous carcass pattern and yield potential in a soft package. A sire we regard very highly. J307's dam is a beautiful feminine breeder and is also the dam of Manchee Jester D281, a proven carcass producing sire. **Homozygous Polled.** He is represented by 5 sons.

MANCHEE LANCELOT J306 (P)

7 September 2013

Lancelot J306 is a quiet, dark coated bull with length and a soft carcass. He is a bull with a great top line and sound structure. His dam is a medium framed, exceptionally soft female with a perfect udder. Pictured is his sire Wilgaroon Sir Lancelot E167. He is represented by 4 sons.

MANCHEE JESTER J128 (P)

18 March 2013

Jester J128 displays a lot of his grand sires traits, he breeds tremendous carcass shape and width into his progeny. J128 is only a young sire who is breeding both exceptional males and females, a low birth weight bull that has been used with heifers. J128 has grown into a magnificent sire, big, muscular and very sound structured. Pictured is his sire Manchee Jester D281. He is represented by 4 sons

WILGAROO DUNKIRK (P) (AI) (ET)

25 February 2008

Dunkirk is an extremely thick bull with an outstanding temperament. He is out of the outstanding cow in Sapphire, the dam of Murrumbo Beaumont (P) a sire that has been very influential in the breed. Sapphire is the dam of 15 calves, 14 classified. He is a purebred Santa bull displaying all the characteristics we are looking for in our Durham Tropical cattle. He is represented by 9 sons.

MANCHEE MEXICO F34

17 February 2010

Mexico F34 is an extremely soft easy doing bull, as all the Mexico cattle tend to be. Mexico F34 breeds a lot of depth of hindquarter and spring of rib into his progeny, which is evident with the extra weight for age they carry. A very quiet bull who has bred a very consistent line of cattle. Pictured is his sire Warenda Mexico. He is represented by 4 sons.

Traits Observed: CE, BWT, 200WT, 600WT, SS, FAT, EMA, IMF

A very impressive long bodied, easy fleshing bull that really stands out in this pen. A wonderful carcass pattern and shaped bull with a lot of sire appeal and weight to 600 days. Dam is a young Tobermorey daughter from a great highly productive female line. The grand dam Y Matilda 59th is one of my favourite cows, a beautiful feminine, good milking female, who always breeds a top calf.

Top 5% - 600 day weight, carcass weight. **Top 10%** - 200 & 400 day weight, milk. **Top 15%** - EMA. **Top 20%** - rump fat. **Top 25%** - rib fat.

Traits Observed: CE, BWT, 200WT, 600WT, SS, FAT, EMA, IMF

A very impressive General son in this part of the catalogue. A very correct bull who is hard to fault, we really admire the strength of top line lot 63 carries. Dam is a beautiful balanced Ossie E65 daughter, which is where lot 63 gets his strength of spine. Y Cloudy J245 is also the dam of Zeus L173 who sold to the Moombi stud for \$28,000 last year.

Top 5% - days to calve, EMA. **Top 10%** - gestation length, scrotal size, domestic maternal index. **Top 15%** - 400 day weight, carcass weight, retail beef yield, export maternal index. **Top 20%** - northern maternal index. **Top 25%** - 600 day weight, IMF.

Traits Observed: BWT, 200WT, 400WT, SS, FAT, EMA, IMF

One of the highest indexing bulls of the breed. It's rare to see such a light birthweight bull with a +76 EBV for 600 day weight. Lot 92 has always been a standout individual, scanned the highest in his contemporary group for most traits. His dam Y Mayflower H105 is the dam of Y Zeus K25 who sold to the Nagol Park stud for \$20,000 in 2015. She is also the dam of retained sire Y Anzac L121 and Y Monkira M78 who sold in last years sale to Brigalow Beef for \$16,000.

Top value - northern maternal index. **Top 1%** - scrotal size, carcass weight, domestic & export maternal indexes. **Top 5%** - 200, 400 & 600 weight, days to calve. **Top 10%** - calving ease direct, retail beef yield. **Top 15%** - calving ease daughters, birth weight, EMA. **Top 20%** - gestation length.

The Durham Tropical program was developed in conjunction with a Central Australian cattleman to breed bulls that have high meat quality, fertility and heat tolerance. To do this we incorporated our two highest DNA tested Santa Gertrudis sire lines for marbling and tenderness. The selected sire lines were backed by females of exceptional breeding quality, with 100% fertility. The Durham Tropical cattle continue to perform both in feedlot and carcass competitions as well as in our breeding program with stringent fertility and adaptability requirements. Durham Tropical steers have performed well in all steer trials competed in. In 2014 and 2013, Durham Tropical steers won the RAS 70 day domestic competition and in 2013 they won Champion EU pen of steers in the Primex Beef competition. **The Trop Beef Chip Tenderness score is from 1-10 with 1 being the best.**

DIRECTIONS TO MANCHEE AGRICULTURE

YOU CAN ALSO FIND US ON **GOOGLE MAPS** BY SEARCHING FOR MANCHEE AGRICULTURE.

Look for blue & white MANCHEE AG road signs.

FROM NARRABRI:

Follow the main street (Maitland St) south east, under the railway overpass near the RSL club on the outskirts of town.

Continue on this road for 12 km, turn left onto the Maules Creek Rd. Do not go over the Namoi River (single lane bridge). Travel on this road for 9 km.

FROM GUNNEDAH:

Travel on the Kamilaroi Hwy through Boggabri, approx 17km turn right towards Harparary & Maules Creek. After going over the Namoi River, at a telephone exchange, turn left. Travel 8 km, turn left towards Narrabri at the T-intersection. Travel 8 km to Manchee Ag on the left.

ACCOMMODATION CAN BE DIFFICULT TO GET IN NARRABRI - PLEASE BOOK EARLY.
MOTEL DETAILS ARE AVAILABLE ON THE SALE INFORMATION PAGE.

Independant sale day advice from Alastair Rayner

Specialising in:

- > bull selection
- > EBV explanation & application
- > technical advice

For more information visit raynerag.com.au

Rayner4g

Lots showing the YY logo are selected as potential sires or donors for Manchee Agriculture to use in the future. Manchee Agriculture retains the right to collect up to 300 straws, for in herd use at no cost to the purchaser. Manchee Agriculture will collect semen at an agreed time with the purchaser.

SUPPLEMENTARY SHEET

All bulls will have up to date weights, EMA, fat depth, scrotal size measurements and have been semen tested. A supplementary sheet with this information will be available from the 21st August, 2018. Group Breedplan figures are printed in the catalogue. Any bull with a shaded Breedplan figure indicates he is in the Top 25% of the breed for that trait.

INSPECTION

We encourage prospective buyers to inspect cattle prior to sale. This gives us an opportunity to assist you in your selection of the best genetics for your requirements. Inspection on sale day will be from 9am.

ACCOMMODATION

Accommodation can be hard to get in Narrabri, we recommend you book early.

Nandewar Motor Inn - (02) 6792 1155 or 1800 027 941.

Southern Cross Motor Inn - (02) 6792 3838.

Club Motor Inn - (02) 6792 3191

Mid Town Inn - (02) 6792 2233

Adelong Motel - (02) 6792 1488

TRANSPORT

Bulls sold in to Queensland, South Australia, Victoria, Tasmania and Northern Territory are eligible for a transport rebate from Manchee Agriculture to the NSW border only.

HEALTH

All bulls have been vaccinated with VibrioVac, 7 in 1 and Pestiguard and drenched with Dectomax on 12th July 2018. Booster shots are due in June each year. Semen testing will be carried out by Geoff Steinbeck, Excel Genetics, Dungowan. (02) 6769 4251. The bulls are guaranteed fertile on the day of the sale.

BREEDING GUARANTEE

All bulls are guaranteed to be breeders with the exception of:

- (a) In the event of injury or disease that occurs to the animal after the sale;
- (b) Gross negligence or wilful misconduct on the part of the purchaser.

BUYERS INSTRUCTION

1. No verbal instructions will be accepted.
2. Please use the instruction slip provided by the settling agents and hand it to the booking clerk before leaving.
3. Instructions for dispatch for consignments comprising of more than one owner must be signed by each buyer, no instructions will be considered complete until all have been signed.
4. All bulls will be sold GST exclusive.

BUYER REGISTRATION

We request that all prospective buyers register and receive a buyer number before the sale.

OUTSIDE AGENT REBATE

An outside agent rebate of 3% will be offered to agents who attend the sale and introduce their clients in writing to Hamilton Mortimer Agency, 02 6792 3163, at least 24 hours prior to the sale. Agents introducing their clients in writing at least 24 hours prior to the sale and not attending the sale will be paid a 1% rebate. The rebate WILL NOT be paid outside these conditions.

AIRCRAFT

There is an airstrip at Narrabri. Vendor's agents will be happy to arrange transport to the sale. Please make contact well before the sale date.

DISCLAIMER

The vendors, selling agents, its members, related corporations and employees, will act with due care to provide correct information but will not be responsible for any errors or omissions in this catalogue. All persons who attend the sale do so entirely at their own risk and the vendor, Manchee Agriculture, JT & EN Manchee, LJC & RT Manchee and the selling agents do not assume or accept any responsibility or liability, of whatever nature, legal or otherwise, for any accident, injury or damage which may occur.
