The combination of carcase performance and fertility are two of the most difficult traits to balance in a beef cattle herd, which has never been more evident than now, in a dry time. The fertility records of the Shorthorn female is unsurpassed by any other beef breed. Specifically, the Yamburgan cow herd returned a pregnancy test rate of 90% this year, a fantastic result and indicates the effectiveness of 72 years of fertility selection. This depth of breeding signifies how resilient a herd can be with the right selection criteria.

We know a lot of clients have sold down their cow herds which is understandable considering the price and availability of fodder, but the positive is it's an opportunity to buy into the top percentage of Yamburgan's genetics. We also know beef prices will increase with drought breaking rain and the major exporters are reporting record sales and prices for beef around the world. We have seen this cycle before in 2014/15 where prices increased rapidly.

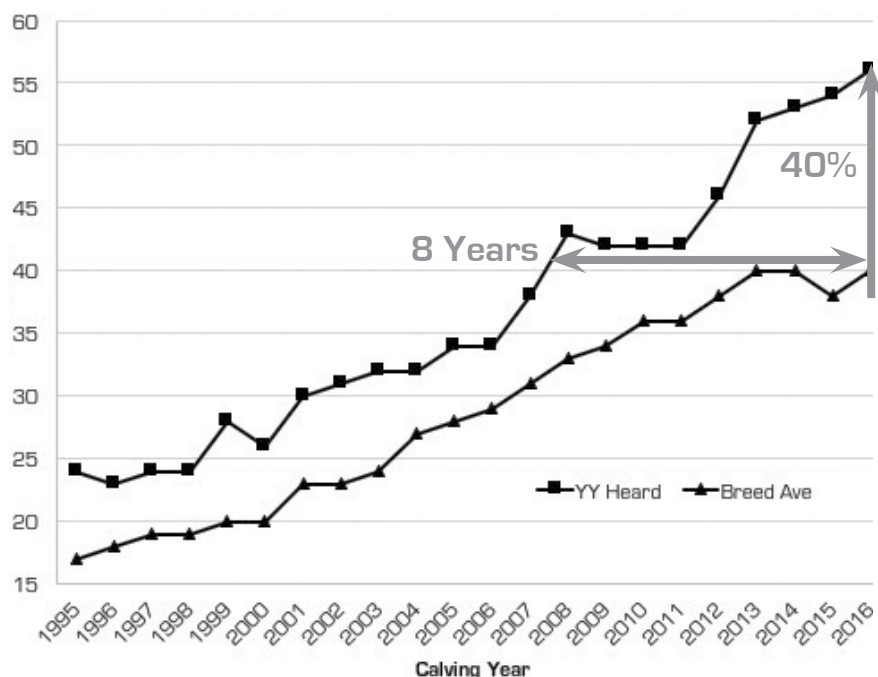

This year's sale draft will include 70 Shorthorn bulls and 23 Durham Tropical bulls. The bulls went onto oats on the 15th June and are an extremely even line considering the reduced numbers on offer this year. The Emperor sons continue to impress with their softness and constitution in drought conditions. A great draft of yearling bulls by Y Monkira K303 who has continued to impress with a draft of high indexing sires across all traits.

Please don't hesitate to contact us for further information. We look forward to seeing you at our 25th annual sale.

John Manchee

TAKE A 8 YEAR GENETIC LEAP

The Northern Maternal Index of the Yamburgan Herd is 8 years ahead and 40% above the breed average.

We are continually impressed with the consistency of the Yamburgan genetics, with a great win in the Casino Primex Feedlot Competition. Yamburgan steers were awarded first for feedlot performance. They were fed for 100 days at the Maydan Feedlot, Warwick Qld. The pen of 10 steers were assessed for weight gain, feed efficiency, and feedlot performance (health). The pen of 18 month steers had an HGP free average daily weight gain of 2.67 kg/day. Once on the hook their average dressed weight was 326 kg. The steers were sired by Yamburgan Emperor G679, Yamburgan H140 and Yamburgan Monsoon J37.

This win comes on the back of a long history of Manchee Ag genetics proving successful in feedlot and carcass competitions. There has been more than 75 wins in these types of competitions over the last 10 years in all areas including grassfed and feedlot competitions. This consistency over time proves the MA breeding program is balanced delivering commercial producers more options and a profitable return.

MANCHEE AG WINS OVER THE LAST 5 YEARS

2019	Casino Primex Feedlot Competition	1st Feedlot performance - Pen of 10
2018	Beef Australia ANZ National Carcase Competition	Class 5: 2nd Pen (260-340kg dressed, 100 day) Class 6: 4th Pen (300-420kg dressed, 100 day) Class 7: 3rd Pen (260-340kg dressed, unrestricted)
2017	RAS Beef Challenge	Champion Pen - 100 Day Export Champion Individual Reserve Champion Individual 1st, 2nd & 3rd Pens for Profitability 1st & 3rd Pens for Feedlot Performance 2nd Pen Carcase Grid
2016	RNA Paddock to Plate Competition	Reserve Champion Pen
2015	Beef Australia ANZ National Carcase Competition	Champion Carcase, two firsts, a second, a third and two fifths

Performance recording is of vital importance in the Manchee Agriculture operation. MA believes in the utilisation of large contemporary groups to allow animals, that meet our tough selection criteria, to be identified and offered at our sale. **This years two year old bulls were assessed for scanning in a contemporary group of 88 bulls, the yearling bulls were in a group of 41 bulls and the Durham Tropical bulls were in a group of 33 bulls.**

Our ability to focus on the combination of practical breeding principles including fertility, calving ease, weight for age and carcass quality sets MA apart when it comes to our strength in all selection indexes.

CE % Direct = Direct Calving Ease - influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 & 300 days of age. Values are adjusted to 200 days and for age of dam.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam.

Mature Cow Weight EBV (kg) based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

Milk EBV (kg) estimates an animal's milking ability. For sires, it indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

Carcass Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at

the 12/13th rib site of a 300 kg dressed carcass.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield in a standard 300 kg carcass.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indices (\$'s) are reported as EBVs, in units of relative earning capacity for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values.

Domestic Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting pasture grown and finished steers for the domestic trade (eg. supermarket).

Export Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in a temperate environment (eg Shorthorn, Angus or Hereford cows) targeting steers for the Japanese B3 market. Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days.

Northern Maternal Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined in an example commercial herd in northern Australia (eg Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10 mm P8 fat depth).

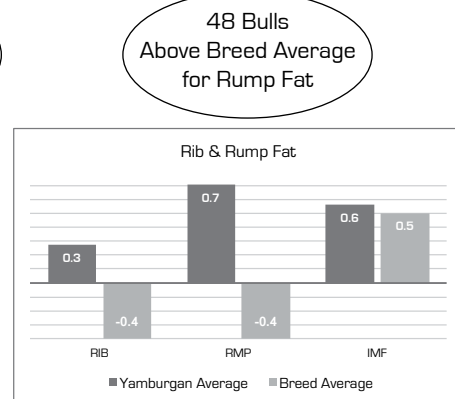

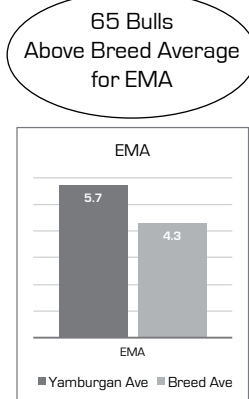

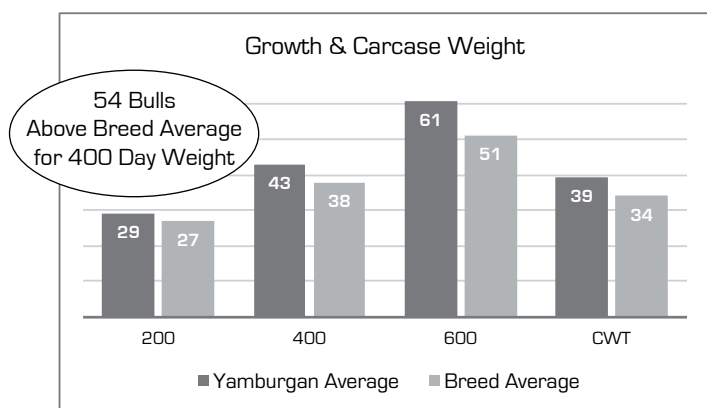

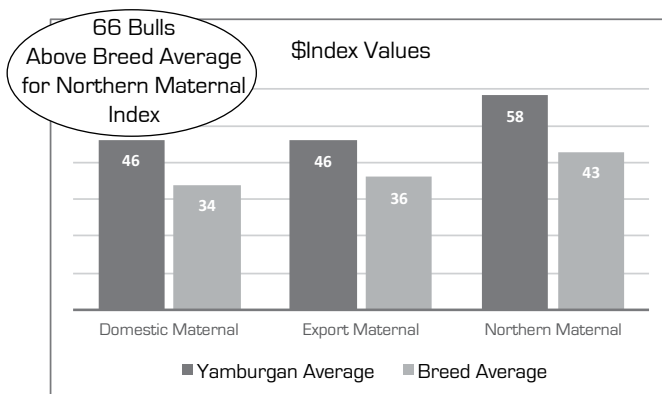

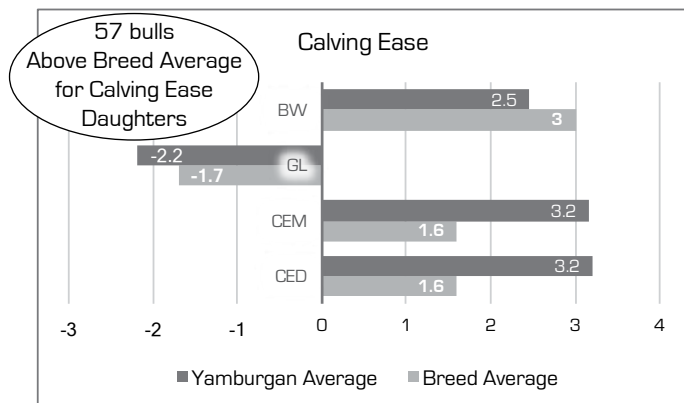

Accuracy (%) - An accuracy value is presented as a percentage with every EBV. Accuracy of 90% & above are a high accuracy estimate of the animal's true breeding value and it is unlikely that EBVs will change considerably with additional data. Accuracy of 75 - 90% are of medium-high accuracy and will usually have been calculated based on the animal's own performance and the performance for a small number of progeny. Accuracy of 50 - 74% are of medium accuracy and will usually have been calculated based on the animal's own performance and some pedigree information. Accuracy of less than 50% are preliminary and could change substantially as more direct performance information becomes available.

Traits Observed: BWT, 600WT, SS, FAT, EMA, IMF.

A young sire with enormous potential, Lot 3 has been one of the standouts in his contemporary group since weaning. Emperor E103 is producing outstanding females that are breeding on, and BP Countess D14 we regard as one of our best breeding females. It is rare to find this combination of high IMF, EMA and fats.

Top 1% - rib & rump fat, IMF, export maternal & northern maternal indexes. **Top 5%** - 600 day weight, EMA, domestic maternal index. **Top 15%** - gestation length, 400 day weight. **Top 20%** - 200 day weight.

Champion results in the Southern Grass fed Carcase competition out of 1600 entries.

Congratulations to Mike Newton, Penola SA for winning the Champion pen of 3 and pen of 10 steers over 320kg dressed in August 2017.

The winning steers were purebred shorthorns 18 months of age and processed at Teys Naracoorte. Mike has recently used sons of Y Emperor, Y Zeus and BP Thunder.

**THE GROVE GIGABYTES J0837 (P)**

24 September 2013

Gigabytes has bred very soft, high marbling cattle with a lot of body capacity and weight for age. His daughters are easy doing, fertile, good milking females. We have used Gigabytes in a flush with three of our top performing female lines with three sons retained. He is a trait leader for 400 & 600 day weight, EMA and IMF. Top 15% for Export Maternal Index. He is represented by 6 sons.

170 Progeny Analysed, 159 Birth Weight Progeny, 90 Scan Progeny, 8 daughters.

**YAMBURGAN ZEUS H140 (P)**

22 April 2012

Zeus H140 is an outstanding sire offering low birth, a proven carcass sire and a feminine female producer. The further we go down the track with Zeus the more impressed we are with his progeny. He is a trait leader for gestation length, birth weight and scrotal size. He is a genuine calving ease sire. He is in the top 1% for gestation length, days to calving as well as Domestic Maternal Index. Top 5% Export Maternal and Northern Maternal Indexes. He is represented by 11 sons.

**YAMBURGAN MONSOON J37 (P) (AI)**

26 February 2013

J37 is a very stylish, good fronted sire and an extremely well muscled bull with a lot of width. He was used lightly on heifers in his first year resulting in this drop of calves. We will continue to use him heavily in years to come. His dam is one of the highest performing females of the Shorthorn breed, with three sons retained. He is a trait leader for birth weight and is in the top 1% for all three indexes. He is represented by 1 son.

YAMBURGAN SPARTA K571 (P)

13 October 2014

K571 is a very correct, upstanding sire who was sold to the Futurity Stud for \$36,000. We have been very impressed with how all the Sparta genetics have bred, they are truly high carcase cattle, whilst retaining softness and fat cover. Two sons of Sparta K571 have been retained. He is a trait leader for 400 & 600 day weight, SS, EMA and RBY. Top 5% for Domestic Maternal and Northern Maternal indexes. He is represented by 5 sons.

THE GROVE F915 (P)

3 November 2010

The Grove F915 was loaned to us by Peter Caskey in 2015 after seeing the performance of the calves at Little Amp, SA. He is a moderate framed, deep hind quartered bull, who breeds very true to type. F915 is a trait leader for birth weight and is in the top 5% for rib and rump fat. He is represented by 7 sons.

YAMBURGAN MONKIRA K303 (P)

11 August 2014

K303 has impeccable breeding and performance data to match being the maternal brother to H140. He has bred extremely wide thurled cattle with excellent structure, shoulder placement and angle. The Tobermorey genetics have consistently performed in all carcase trials, yielding and grading very highly. He is a trait leader for SS, EMA and RBY. He is in the top 1% for Domestic Maternal and Export Maternal indexes and the top 5% for Northern Maternal Index. He is represented by 7 sons.

**YAMBURGAN GENERAL H188 (P) (AI)**

29 June 2012

Y General H188 sold in our 2014 sale to Peter Caskey, SA, for \$27,000. General has developed into a magnificent sire, a very soft, easy doing sire with explosive growth to 400 days. General is a moderate framed bull with a lot of width through the hindquarter. We believe General has influenced the Yamburgan herd through his combination of softness and muscle in an efficient package. He is a trait leader for 200, 400, 600 day weight.

He is represented by 3 sons.

**YAMBURGAN EMPEROR G679 (P)**

3 October 2011

G679 has bred a beautiful line of replacement females. They are very long bodied, excellent fronted and high milking. The Emperor genetics continually distribute fat evenly and have performed well in recent carcass trials. He is a trait leader for 600 day weight, SS, and EMA. He is in the top 5% for Northern Maternal Index, top 10% for Domestic Maternal Index and the top 15% for Export Maternal Index.

He is represented by 7 sons.

**YAMBURGAN MONKIRA L103 (P)**

16 March 2015

L103 has very similar genetics to K303. L103 produces very high EMA progeny as he is very strong topped with excellent fill behind the shoulder and is one of the widest thurled sires ever retained. This is his first drop of calves and we will use him heavily in future joining's. He is a trait leader for SS, EMA and RBV. He is in the top 5% for all three indexes. Pictured is his sire Y Tobermore F90.

He is represented by 6 sons.

MANCHEE LANCELOT J307 (P)

7 September 2013

Lancelot J307 was an outstanding individual from a very early age, a sire with an enormous carcass pattern and yield potential in a soft package. A sire we regard very highly. J307's dam is a beautiful feminine breeder and is also the dam of Manchee Jester D281, a proven carcass producing sire. Homozygous Polled. He is represented by 8 sons.

MANCHEE LANCELOT J306 (P)

7 September 2013

Lancelot J306 is a quiet, dark coated bull with length and a soft carcass. He is a bull with a great top line and sound structure. His dam is a medium framed, exceptionally soft female with a perfect udder. Pictured is his sire Wilgaroon Sir Lancelot E167. He is represented by 4 sons.

MANCHEE MEXICO H96 (P)

10 March 2012

Mexico H96 breeds a lot of weight for age and depth through the hindquarter. A very smooth coated, structurally correct, quiet bull that has been used heavily in our Durham Tropical program. The Mexico bloodlines are synonymous with adding softness and carcass to their progeny. Pictured is his sire Warenda Mexico. He is represented by 5 sons.

MURRUMBO BEAUMON 1707/4 (P)

26 August 1994

Beaumont was an influential sire in both the Wilgaroon herd and the Santa Gertrudis breed in general. His maternal attributes was his strength, leaving quiet, fertile, feminine females. He has strong polled genetics and produces quiet cattle. He is represented by 4 sons.

KIDMAN QUICKSILVER J32 (P)

1 September 2013

J32 was purchased from Kidman Park to maintain the Mexico bloodline through the potent Quicksilver line. J32 has bred high marbling, softness and high growth (top 10% for 200, 400 & 600 day weight) and is in the top 20% for both the Domestic and Export Indexes. He is represented by 2 sons.

Traits Observed: CE, BWT, 600WT, SS, FAT, EMA, IMF

N177 is a long bodied, quiet, very sound Zeus sire who has one of the best data sets of the breed. It's rare to see a bull with such balanced figures, low birth, high Calving Ease, EMA and rib and rump fats. Lot 10's dam is from the very consistent Royal breeding line, the Grand Dam Y Royal 70th is the Dam of Y Poseidon D176, who sold to Peter & Charmaine Cook, "Barana" stud for \$13,000 in 2010.

Top 1% - scrotal size, days to calving, domestic maternal, export maternal & northern maternal index. **Top 5%** - EMA. **Top 10%** - gestation length, 400 & 600 day weight, carcass weight, rib fat. **Top 15%** - rump fat. **Top 20%** - 200 day weight.

LOT A - M1052 - 25 straws, buyer of lot A has the option of lot B at the same price.

LOT B - M1052 - 25 straws

LOT C - M1052 - 10 straws

Offering 3 packages of semen in Yamburgan Gigabytes M1052, to be sold on a per straw basis. The buyer of Lot A has the option of purchasing Lot B for the same price.

Homozygous Polled.

We have been very impressed with the first drop of calves to hit the ground by M1052, his calves are low birth-weight, quick growing and stand out from an early age. M1052 is a very correct, excellent fronted bull, very similar to his maternal brother, Yamburgan Zeus H140.

A small package of 10 straws has been sold to the Kamilaroi stud, Tamworth, other than that, this is the only semen to be sold in M1052 this year.

Top 5% - EMA, IMF, domestic, export and northern maternal indexes. **Top 10%** - Scrotal size, days to calving, carcass weight, rib & rump fats. **Top 20%** - calving ease daughters, birthweight, 400 days weight & milk

Purchaser _____ \$ _____

The Durham Tropical program was developed in conjunction with a Central Australian cattleman to breed bulls that have high meat quality, fertility and heat tolerance. To do this we incorporated our two highest DNA tested Santa Gertrudis sire lines for marbling and tenderness. The selected sire lines were backed by females of exceptional breeding quality, with 100% fertility. The Durham Tropical cattle continue to perform both in feedlot and carcass competitions as well as in our breeding program with stringent fertility and adaptability requirements. Durham Tropical steers have performed well in all steer trials competed in. In 2014 and 2013, Durham Tropical steers won the RAS 70 day domestic competition and in 2013 they won Champion EU pen of steers in the Primex Beef competition.

Lots showing the YY logo are selected as potential sires or donors for Manchee Agriculture to use in the future. Manchee Agriculture retains the right to collect up to 300 straws, for in herd use at no cost to the purchaser. Manchee Agriculture will collect semen at an agreed time with the purchaser.

SUPPLEMENTARY SHEET

All bulls will have up to date weights, EMA, fat depth, scrotal size measurements and have been semen tested. A supplementary sheet with this information will be available from the 21st August, 2019. Group Breedplan figures are printed in the catalogue. Any bull with a shaded Breedplan figure indicates he is in the Top 20% of the breed for that trait.

INSPECTION

We encourage prospective buyers to inspect cattle prior to sale. This gives us an opportunity to assist you in your selection of the best genetics for your requirements. Inspection on sale day will be from 9am.

ACCOMMODATION

Accommodation can be hard to get in Narrabri, we recommend you book early.

Nandewar Motor Inn - (02) 6792 1155 or 1800 027 941.

Southern Cross Motor Inn - (02) 6792 3838.

Club Motor Inn - (02) 6792 3191

Mid Town Inn - (02) 6792 2233

Adelong Motel - (02) 6792 1488

TRANSPORT

Bulls sold in to Queensland, South Australia, Victoria, Tasmania and Northern Territory are eligible for a transport rebate from Manchee Agriculture to the NSW border only.

HEALTH

All bulls have been vaccinated with 7 in 1 and Pestiguard and drenched with Dectomax on 8th June 2019. Booster shots are due in June each year. Semen testing will be carried out by Geoff Steinbeck, Excel Genetics, Dungowan. (02) 6769 4251. The bulls are guaranteed fertile on the day of the sale.

BREEDING GUARANTEE

All bulls are guaranteed to be breeders with the exception of:

- (a) In the event of injury or disease that occurs to the animal after the sale;
- (b) Gross negligence or wilful misconduct on the part of the purchaser.

BUYERS INSTRUCTION

1. No verbal instructions will be accepted.
2. Please use the instruction slip provided by the settling agents and hand it to the booking clerk before leaving.
3. Instructions for dispatch for consignments comprising of more than one owner must be signed by each buyer, no instructions will be considered complete until all have been signed.
4. All bulls will be sold GST exclusive.

BUYER REGISTRATION

We request that all prospective buyers register and receive a buyer number before the sale.

OUTSIDE AGENT REBATE

An outside agent rebate of 3% will be offered to agents who attend the sale and introduce their clients in writing to Hamilton Mortimer Agency, 02 6792 3163, at least 24 hours prior to the sale. Agents introducing their clients in writing at least 24 hours prior to the sale and not attending the sale will be paid a 1% rebate. The rebate WILL NOT be paid outside these conditions.

AIRCRAFT

There is an airstrip at Narrabri. Vendor's agents will be happy to arrange transport to the sale. Please make contact well before the sale date.

DISCLAIMER

The vendors, selling agents, its members, related corporations and employees, will act with due care to provide correct information but will not be responsible for any errors or omissions in this catalogue. All persons who attend the sale do so entirely at their own risk and the vendor, Manchee Agriculture, JT & EN Manchee, LJC & RT Manchee and the selling agents do not assume or accept any responsibility or liability, of whatever nature, legal or otherwise, for any accident, injury or damage which may occur.
